

## REMARKS/ARGUMENTS

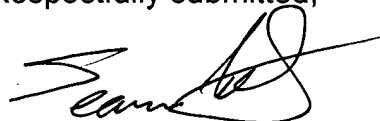

Claim Status: Claims 1-49 remain in the application.

The Examiner has acknowledged that claims 1-26 and 33-49 are directed to allowable subject matter.

The Examiner also indicated that the remaining claims 27-32 would be allowable if amended to overcome the rejection under 35 U.S.C. 112 regarding the inappropriate placement of a period which makes the claim indefinite. Appropriate correction has been made. Accordingly, applicant believes claims 27-32 are now in condition for allowance.

Regarding the objections to the drawings as being informal and of a freehand nature, formal drawings are submitted herewith that properly reference the various components of the invention.

Respectfully submitted,
